**GP Database**

The Division often receives requests for GP contact details from local hospitals and health providers. The Division considers it important that local health providers have up to date GP contact lists to promote regular and quality communication to GPs regarding their patients.

The Division maintains a strict policy that the GP Database (which includes GP name, practice address, phone and fax only) are not to be released unless the information is to be used directly for the transfer of patient information. *Under no circumstances will GP contact details be provided to pharmaceutical companies or any other commercial agencies.*

As the Division's GP Database only includes information listed in the telephone directory, all GPs are automatically included in the database, unless you have specifically opted out.

**Please tick the following box if you DO NOT WISH to be included in the GP Database for distribution to local Health Providers or on the Website..**

The Division has received a specific request from the UQ School of Medicine Rural Clinical Division – CQ Region for a copy of the GP Database to ensure effective communication with local practices.

**Please tick the following box if you DO NOT WISH your details to be provided to School of Medicine.**
