

TRANSPORTING VACCINES

WHAT YOU NEED TO KNOW

Vaccines are very sensitive to temperature changes and if not stored correctly (i.e. between 2° C and 8° C) they won't protect you from disease or illness.

**DON'T WASTE YOUR
VACCINES...
OR YOUR MONEY!**

Turn this leaflet over to find out how to correctly transport and store your vaccines....

HOW TO CORRECTLY TRANSPORT AND STORE VACCINES

DIRECT DELIVERY

The pharmacy may be able to deliver your vaccine directly to the surgery. Practice staff can arrange this for you.

FROM THE PHARMACY

Carry the vaccine in an esky or cooler, **NOT** in your bag!

AT HOME

Vaccine

Keep your vaccine in the middle shelf of the fridge when at home.
